

WHAT IS CLAIMED IS:

1. ~~A method for producing an intermediate product made of a fiber~~  
reinforced composite composed of a reinforcing fiber impregnated with a  
thermosetting resin or a thermoplastic resin, comprising: (a) the first process  
5 where a plurality of sheets made of said fiber-reinforced composite are  
laminated to each other, heated under a pressure, and cooled under a pressure to  
provide a flat plate-shaped laminate; (b) the second process where said flat  
plate-shaped laminate is cut into a plate; and (c) the third process where said  
plate is softened by heating, placed on a forming tool, and formed by cooling  
10 under a pressure

2. The method for producing an intermediate product according to claim 1,  
wherein said intermediate product is a semi-hardened product having a  
hardening degree of 1 to 50 %, said fiber-reinforced composite being composed  
of a reinforcing fiber impregnated with a thermosetting resin.
